#### Ceramic C1, 2022

Rooted in the intersection of man and nature, this uncanny collection employs recyclable, metalized ceramic insulator modules — conventionally used in electrical grids and poles — to form ambient spotlights via a patented manufacturing process. Manifested as architectural lamps and pendants of varying length, the high-tech fixtures represent a harmonious union of object, earth and universe. Their organic volcanic forms emit a warm glow from a dimmable LED bulb diffused by an embedded lens. Reminiscent of lava or fire, it bestows the designs and the surrounding space with a simultaneously terrestrial and otherworldly aura.

Ceramic C1, 2022

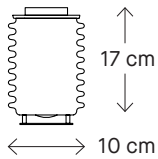

Ceramic body  
Bronzed steel flange  
Glass lense

## Product Specifications

17cm h x Ø 10cm  
Weight: 1kg  
Handcrafted in Italy

## Technical Specifications

Input voltage: 110 / 240V  
Output voltage: 18V - 700ma DC  
Light Source: 9W LED Dimmable (2700k)  
Brightness: 1500L  
CRI: 90  
Certification: All components CE, UL conform

Registered Office  
7 Torriano Mews  
NW5 2RZ  
London UK

Glass lense

Available finishes  
Brown N02132022051015/1

Due to the hand made nature of this object, small imperfections in surface finish may be possible.

#### Cleaning Instructions

Before cleaning, light fixtures must be turned off and unplugged from the mains electricity. Whilst cleaning please be extremely careful. Use a damp cloth or window cleaning product. Make sure the product is completely dry before switching the electricity on.

Please note brass is a soft material and must be handled with extra care. For aintenance, only use lint-free dust cloths and wear the white cotton gloves, provided, if handling it. To polish, use a good quality nonabrasive brasscleaner and extra soft dust cloths (lint-free). If in doubt contact your point of sale or [sales@nitacollection.com](mailto:sales@nitacollection.com).
